Key Features

Accelerated Reader Quizzing

NEO 2 allows students to take **Accelerated Reader Quizzes**, which gives you an exciting new option for assessing students' daily reading practice.

With NEO 2, your students can view AR Quiz questions, and easily scroll to choose from multiple answer options.

2Know! Classroom Response Functionality

Ask multiple choice, true/false, yes/no, numeric, and even short answer questions, and students can respond immediately using their NEO 2s.

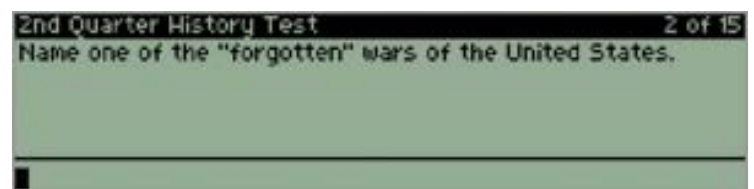

NEO 2 includes **2Know! classroom response system** functionality, giving you the ability to conduct an endless supply of instant quizzes and assessments using a projector, interactive whiteboard, or any standard computer.

With NEO 2 and **2Know! Toolbar**, you can ask multiple choice, true/false, yes/no, numeric, and even short answer questions, and students respond immediately. The toolbar allows you to control the software from anywhere in the classroom so you can ask students questions "on the fly" without having to stop to enter questions or student data. As students answer questions on their NEO 2s, the toolbar quickly tallies and displays student response so you know whether or not students are learning what you are teaching.

AccelTest

NEO 2 **SmartOption Mobile Labs** come with **AccelTest software**, which allows you to easily integrate daily formative assessment into the classroom.

NEO 2 **SmartOption Mobile Labs** come with **AccelTest** software, which gives you access to 8,000 sample questions to easily build student-paced or teacher-paced **formal assessments**. Teachers can also easily create their own questions. Either way, AccelTest allows you to send assessments that you can personalize for each student.

Using AccelTest, you can create a nearly endless supply of reusable quizzes, tests, and other exercises to assess students' performance in virtually any subject, in conjunction with virtually any textbook. Real-time scoring of questions helps you know immediately how well students are learning so you can provide **personalized instruction**.

Google Docs

NEO 2 works seamlessly with documents in Google Docs, allowing students and teachers to access, store, edit, and share documents wirelessly.

AlphaQuiz

Easily design, deliver, grade, and analyze student quizzes, generate reports, and export scores to computer-based grade book applications.

The AlphaQuiz SmartApplet System includes three easy-to-use tools that work together to help you design, deliver, grade, and analyze student quizzes taken on NEOs.

QuizDesigner makes it easy for you to create quizzes for nearly any subject. Installed on your computer, QuizDesigner helps you design true/false, multiple choice, short answer, or essay questions to assess students quickly and pinpoint areas for improvement. Once created, quiz questions can be stored in the library for easy quiz creation throughout the year.

QuizManager helps you easily distribute quizzes to students' NEOs and collect student responses. You can send quizzes to individual students, student groups, or your entire class. As it collects students' answers, QuizManager will automatically grade true/false, multiple choice, and short answer questions.

AlphaQuiz is the SmartApplet on the NEO where students take the quiz. After completing the quiz, students can either print their responses or wait for you to retrieve them using QuizManager. Once quizzes are graded, you can generate a variety of reports including a Statistical Report with class averages, medians, score distribution, and frequency of missed questions. You can also export scores into many computer-based grade book applications.

Other features:

Differentiate instruction with NEO's linked files to provide each student customized assignments, instruction, writing checklists, and support materials.

Use AccelTest to create and conduct individual quizzes for students with special needs, by distributing them simultaneously and privately to individual NEOs at the touch of a button.

Keep students organized with handy daily or weekly checklists. Simple, read-only linked files take only minutes to create and upload to every NEO.

Larger, multiple-font display improves readability for students with vision challenges.

Customizable assistive key features help students with unsteady hands or difficulty in targeting keys.

Solid-state design keeps NEO standing up to the toughest conditions. The durable NEO is always ready to work whenever and wherever your students are.

Ultra-simple operation, including instant on/off, one-key file access, and single keystroke sending means less time waiting and more time writing.
